Terracotta and glazed antique tiles

price list 2024

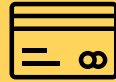

todobarro.com

Terms of sale

Production time

The manufacture of our products takes us between 60 and 90 days from the formalization of the order. This period can be shortened or extended depending on weather conditions that favor or prevent cooking.

Order Formalization

Order Formalization
Initial payment of 50% of the amount budgeted and the remaining 50% after delivery. For international orders 100% of the budgeted amount will be required.

Check our FAQs

Check the requirements and limitations of our products through this link. EAmong other things, we recommend not using them in frozen areas or in salt chlorinated pools.

Services

Quotation without commitment

We generate an adapted quote for each client need. This way is the most effective to know the costs disaggregated from the material of your interest.

Technical office

Our technical team can advise you on:

- Customization and project planning.
- Installation process.
- Process of cleaning, protection and maintenance.
- Facilitation of guides tb. for all steps.

Sample set for professionals

We send a set of samples without cost or commitment. This is the best way to appreciate the silky texture and the nuances of the shades we manufacture. Transport fees will be charged for deliveries outside of Spain.

Cleaning and protection

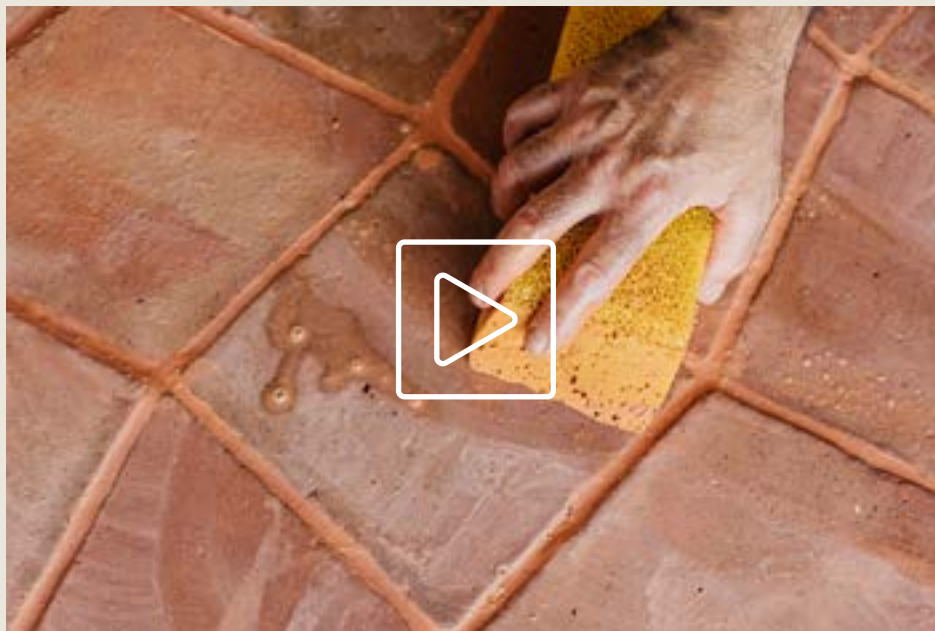

Effective cleaning and protection

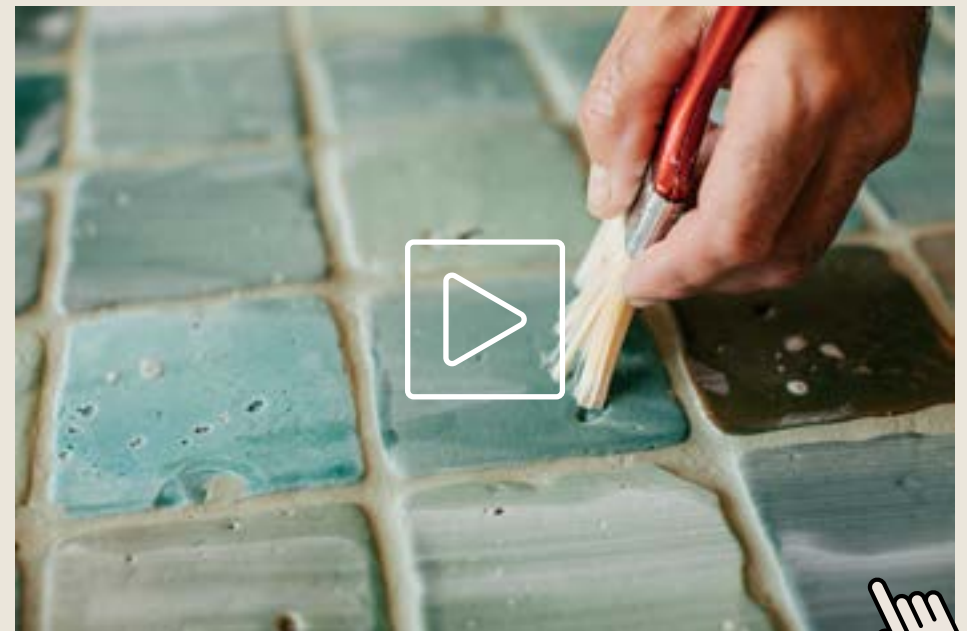

It is necessary to apply adequate protection that allows keep the material in the best possible condition. Is very important to follow our guides and consult us about any aspect you consider.

For protective treatments to be effective, there must not be continuous humidity. If these pathologies are seen, it is recommended to eliminate the origin of the problem and place an insulation that prevents potential rising damp before

installing the tiles. The cleaning and protection treatment must be applied 25-30 days after installation to ensure the flooring has completely dried out.

Cleaning and protection of terracotta floors.

Cleaning and protection of glazed floors.

What makes us unique and different

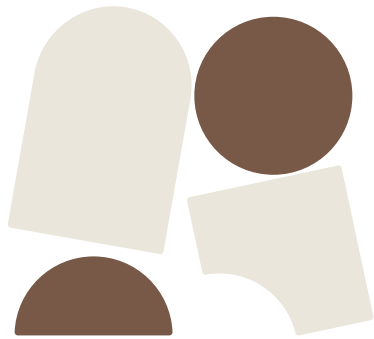

Here at todobarro, we excel in the development of original designs and the creation of new textures and tonalities. We modernize the aesthetic language of fired clay.

This specialization of ours has led numerous media outlets to describe us as neo-craftsmen. Currently, our catalog boasts two exclusive lines for the creation of unique spaces.

- ◆ **Our Premium line** consists of glazed tiles and artisan azulejos which satisfy demands for exclusivity and distinctiveness from even the most discerning of our clients.
- ◆ **Our line of artisanal terracotta** brings a flair of tradition and modernity to any space, thanks to the compatibility of its geometric forms and tonalities. Neo-craftsmanship allows for products which are profoundly customizable and can never be mass produced. In fact, this is one of the principle virtues of products that are made by hand: no two are ever the same.

General information

 Measurements in centimeters

Our handmade tiles present some variations. The measurements represented here are referred to the installation grid. To know the measurements of the pieces and its joints, consult our product sheets.

 Available in 1,1 cm thickness

All our tiles are available in a thickness of 2,1 cm, and some of them are also available in a thickness of 1,1 cm, recommended for installing them on vertical surfaces.

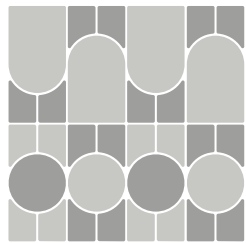

General Index

author collections

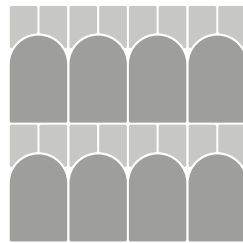

At todobarro we design and collaborate with very talented andalusian designers who possess the capacity to reinvent the aesthetics of terracotta floors and to internalize what this material signifies historically. Our "Nerja" and "Vélez" collections are designed by Carlos Jiménez and LEBLUME studio respectively.

With two different and original perspectives and visions, these authors have taken landscape, architectural and popular elements from the south of the country as a source of inspiration to experiment with the possibilities of fired clay. Both LEBLUME and Carlos Jiménez have been able to adapt their aesthetic languages to shades and textures of our neo-artisan tiles, creating two outstanding collections.

General Index

antique terracotta tiles

Warm, natural and sustainable, our handmade terracotta tiles present an array of distressed textures that evoke those old pavements of a time gone by, immediately drawing our minds to the traditions and legacies of southern Spain. This unique characteristic combined with its own geometry allows us to develop exclusive designs which reinvent the aesthetic vernacular of this organic material, producing an end re-

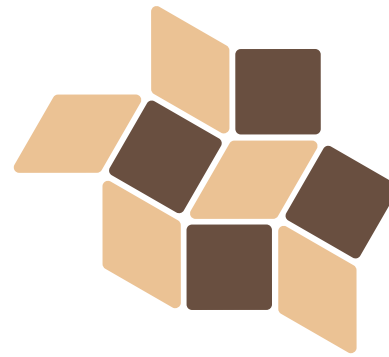

sult which is unique in its timeless and genuine beauty. Each one of our tiles is made entirely by hand. Clay rocks are pulverized and hydrated, then kneaded and modeled into a product which can be cast to create ceramic pieces. These pieces then undergo a firing process in our traditional Arabic ovens, which are powered by biofuels to create an element as natural as the earth itself.

General Index / Antique terracotta tiles

combined formats

Respect for a material which carries such an extensive cultural history is what led us to pursue that peculiar beauty one finds in antique and distressed floors. Using our Antique texture, we bestow these characteristics typical of a vintage style onto new terracotta pieces which are handcrafted by our master craftsmen.

A traditional material which pairs supremely with avant-garde design. It is a hard-wearing and enduring resource with personality, and it is entirely sustainable given that its natural exploitation does not entail any damage to the environment.

General Index

antique glazed tiles

The term "azulejo" has its origins in the Andalusian Arabic word "al-zulayj," which literally means "polished stone." Our collection of handmade glazed ceramic azulejo tiles revives this pottery tradition developed by the Hispano-Arabic artisans of al-Ándalus, whose supreme quality transcended borders during its age of greatest splendor.

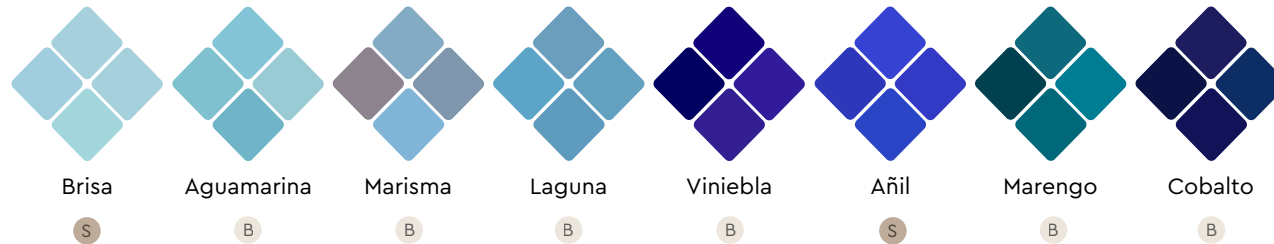

Each one of our glazed ceramic azulejo tiles is completely unique. We can give their surfaces a velvety feel with distressed edges similar to those of antique tiles. This finish lends elegance to the tiles and creates a unique aesthetic which sets them apart.
